Journal of Non-Newtonian Fluid Mechanics, 41 (1992) 383–384
Elsevier Science Publishers B.V., Amsterdam

Contents of Vol. 41

Vol. 41, Nos 1+2

Stability of coextrusion through converging dies
N.R. Anturkar, T.C. Papanastasiou and J.O. Wilkes (Ann Arbor, MI, USA) 1

Further considerations of axisymmetric contraction flows
D.M. Binding (Aberystwyth, UK) 27

A spectral domain decomposition method for the planar non-Newtonian stick–slip problem
R.G. Owens and T.N. Phillips (Aberystwyth, UK) 43

Steady pressure-driven non-Newtonian flow in a partially filled pipe
A.M.J. Davis and T.-Z. Mai (Tuscaloosa, AL, USA) 81

The use of the vane to measure the shear modulus of linear elastic solids
J.D. Sherwood and G.H. Meeten (Cambridge, UK) 101

Porous medium flow of the fluid A1: effects of shear and elongation
J. Vorwerk and P.O. Brunn (Erlangen, Germany) 119

Continuum and molecular interpretation of ideal elastic fluids
D.V. Boger (Parkville, Vic., Australia) and M.E. Mackay (St. Lucia, Qld., Australia) 133

Flow along the centreline behind a sphere in a uniform stream
N. Phan-Thien, R. Zheng and R.I. Tanner (Sydney, NSW, Australia) 151

A study of some numerical viscoelastic schemes
R.I. Tanner and H. Jin (Sydney, NSW, Australia) 171

Book Review 197

Calendar 199

Vol. 41, No. 3

Practical application of a higher order perturbation theory for slender viscoelastic jets and fibers
S.E. Bechtel, J.Z. Cao and M.G. Forest (Columbus, OH, USA) 201

Brownian dynamics simulation of model polymer fluids in shear flow. I. Dumbbell models
J.W. Rudisill and P.T. Cummings (Charlottesville, VA, USA) 275

Degradation effects of dilute polymer solutions on turbulent friction and heat transfer behavior
S.U.S. Choi, Y.I. Cho and K.E. Kasza (Argonne, IL, USA) 289

The converging flow rheometer reconsidered: an example of flow with dominating extension
S. Zahorski (Warsaw, Poland) 309

A study of submerged pseudoplastic laminar jets
C. Jordan, G.W. Rankin and K. Sridhar (Windsor, Ont., Canada) 323

Some boundary value problems for the Bingham model
C. Atkinson and K. El-Ali (London, UK) 339

An unusual prediction utilising FENE-P rheological models in the fibre-spinning problem
M.E. Mackay (St. Lucia, Qld., Australia) and C.J.S. Petrie (Newcastle upon Tyne, UK) 365
